The California Arts Standards and Arts Education Framework

The guiding documents for transitional kindergarten through grade twelve arts education in California are the California Arts Standards and the California Arts Education Framework.

The **Standards** are the “**what**” for student learning expectations, which include outcomes for what we want students to know, understand, and be able to do.

The **framework** is the “**how**” including guidance for instruction, and educational programs regarding how to meet the needs of ALL students.

Every content area, such as math, language arts, and science, has standards and a framework, to ensure student learning outcomes.

Learn more about the CA Arts Standards and Framework at www.calartsedframework.org
